

Sensor Quick Start Guide

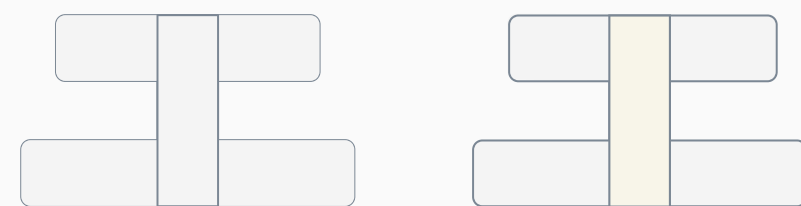

Limb Sensor Placement

1

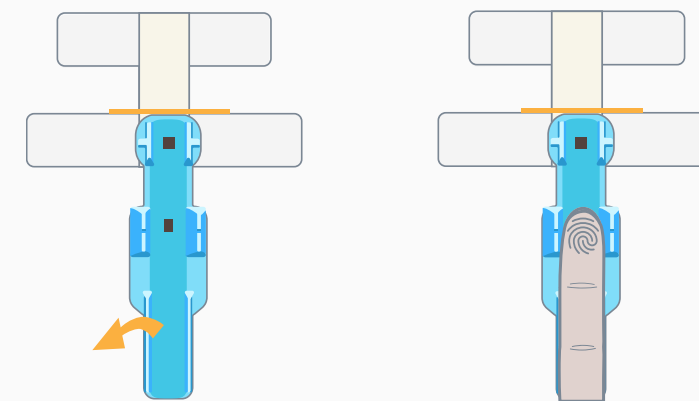

Clean your nail

2

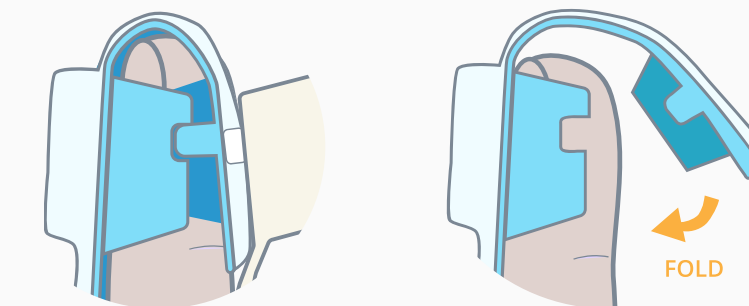

Lay out the adhesive with the white liner side up. Peel the middle section of the liner.

3

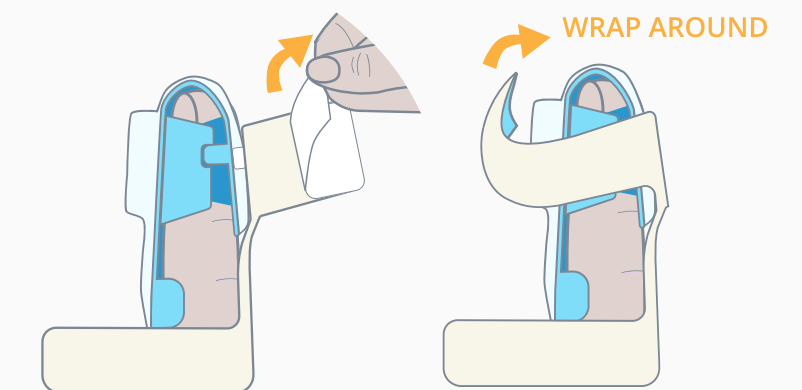

Place the limb sensor with the blue side up onto the adhesive. Place your finger on the sensor.

4

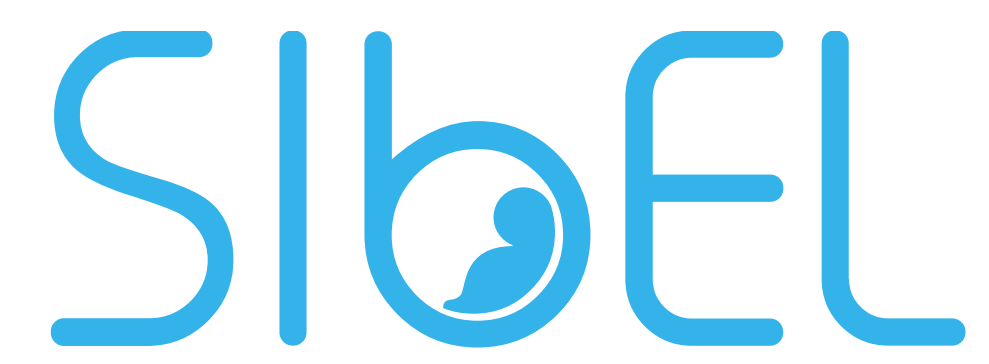

Fold the top of the sensor and adhesive over the fingertip, ensuring the notch and bump align.

5

Peel off the liners from the adhesive and wrap both tabs around the fingertip.
